Performance Fabrics

Luna Textiles’ full collection of bleach cleanable, antimicrobial, and antibacterial products.
In an effort to support the health and well-being of those who live, work, and play among our products, we are happy to provide an assortment of textiles that are easy to clean and maintain.

While we are in the midst of a Global pandemic due to COVID-19, this guide reviews some of our best selling performance fabrics.

Copa | 04
Entenza | 05
Framework | 06
Metro | 07
Stacking Chairs | 08
Bleach Cleanable Collection | 09
Antimicrobial Collection | 10
Antibacterial Collection | 10
Where can I find the full details of how to clean Luna products?
Each product has a cleaning code with maintenance details on our website. For more information on each code, please visit lunatextiles.com/care-cleaning.

What is the difference between antimicrobial and antibacterial?
Antibacterial products help prevent the development of only bacteria within the material. Antimicrobial products prevent the spread of bacteria, fungi, and other organisms. This helps keep products cleaner and fresher for a longer period of time.

Are any of your products wipeable for easy cleaning?
Yes! We have three polyurethanes that are all wipeable and easy to clean. That includes Hardcopy, Token, and Wish.

We’ve been asked a few questions regularly over the recent months and we want to make sure you have all the answers.

Do any of your products help fight or prevent the spread of COVID-19?
The short answer is we are not certain. While we aren’t exactly sure what qualities would make a product resistant to COVID-19 at this time, we know that our antimicrobial products do help fight the spread of many germs. Our bleach cleanable products are easy to clean in order to effectively kill many germs, viruses, and bacteria.
